

# South Attleboro Station: Early Action Demolition and Overnight Work

This Spring, the MBTA will be performing early action construction work at South Attleboro Station. This work will include the demolition of the pedestrian bridge, as well as ramps and stairs around the station area.

**This demolition work is anticipated to start the week of April 17<sup>th</sup> and continue through June of 2023.** This work includes the removal of the pedestrian bridge, existing stairs, inbound ramp, and the ramp from the west parking lot.

To complete this work safely and efficiently, construction crews will complete any work on or near the tracks during overnight hours, Sunday-Thursday. The community can expect noise from heavy machinery, light towers in use and generators running during this overnight work.

Demolition of the ramps at the parking lot area will take place during the day, Monday-Friday.

The MBTA has completed the final design phase of the accessibility improvements at the South Attleboro Station and is currently in the process of acquiring construction funding. These station improvements will provide a modernized and fully accessible station for both bus and pedestrian connections to adjacent neighborhoods.
